

NATURES OWN LUBRICATION & CORROSION PROTECTION.

USER GUIDE

AROUND THE HOME

BENEFITS:

Woolube Ozspray is an invaluable product that lubricates, penetrates and protects most mechanisms and surfaces. Woolube Ozspray leaves a non-drying film that does not evaporate or wash off with water providing extended lubrication and protection. Woolube Ozspray is not a petrochemical based product like all the well known brands that we have used in the past, you now have an alternative that is *non-toxic and environmentally friendly* that really works and in most applications out performs traditional water dispersant, penetrant, lubricant and protection products. Try a can and you will find how versatile this natural Australian product really is.

APPLICATIONS:

Here are some of the many examples of how Woolube Ozspray helps around the home.

- Stop squeaks from hinges on gates, doors and children's toys.
- Having trouble again with that key in a padlock or door one, quick squirt protects and lubricates for long periods.
- Lubricate sliding doors to restore smooth action.
- Oil the bike chain and coat the bike preventing rust, Woolube Ozspray works as well as a polish without the elbow grease.
- Rejuvenate those dried out seals on pool pumps and filters.
- Lubricate tracks for garage doors ensuring trouble free operation.
- Protect your valuable tools from rust and corrosion.
- Release those rusted up nuts and bolts in seconds.

Basically any item that requires lubrication, penetration and protection in the rigors of everyday living can now be done with a little Ozspray.
