

NATURES OWN LUBRICATION & CORROSION PROTECTION

USER GUIDE

LOCKSMITH USAGE

OZSPRAY AEROSOL

- Any moveable parts eg; gate latches, springs, dead latches, deadbolts
- All security door locks with wafer cylinders
- Where window locks and patio bolts may be affected by any corrosive environment
- Great for car door latches and all mechanical arms in doors where grease has hardened
- Spray on striker plates to prevent rusting on screws and plates
- Great on sharpening stone for chisels
- In pin tumbler cylinders when trying to pick and pins are sticking- must clean off when lock is repined
- Great on hinges affected by corrosion to stop squeaking
- All rollers
- Lubricant/coolant when drilling stainless steel
- Screw lubricant for all metals and hardwood

GREASE

- On all wafer locks – car ignitions
- Letter box locks
- Old mortice locks for movement and corrosion protection
- Great for hands and knees – stopping dermatitis
- Safe bolt mechanisms
- Any screws – for anti seize, especially steel and aluminium
